**93,000** square feet of metal roof decking

**44,000** square feet of fiber cement siding

**298** tons of structural steel and metal roof joists

## CIEDA's Construction Team

oversaw the building of the  
Poarch Creek Community Center.  
Their efforts include oversight for design,  
construction, furniture, fixtures, and equipment.

They worked first-hand with the decision makers  
from the Tribe to create not just a building or a  
workable space but to create a total environment  
complete with furnishings and  
decorative components.

Tasked with project development, management  
and oversight of construction projects,  
the CIEDA Construction Team works as a liaison  
between the Tribe and the architects and  
contractors involved in the project.
